SOFTWARE

The PEG will be supported by software that will allow the uploading, collection, analysis and storage of data for each individual subject.

The programme also envisages the PEG evaluation and monitoring sheets for the planned activities.

The objectives also include the creation of an autobiographical card containing the experience, habits, and personal history of the mother placed in the community. This is an anamnesis card filled in by the mother on her own and the child's skills. This tool will help the operator define educational objectives with the mother and thus improve the operators' work and foster a more effective relationship.

Let's find out how to use this tool ...

Good!

There you are at the end of the questionnaire. You have answered all the questions.
Was it challenging? Easy?
In any case, you completed it.
In a few months we will send you an e-mail so that you can fill in the questionnaire again and compare the results of your answers.
But for there to be a change you have to train. For this, we will give you some tips in the report.
You can now access your report in the appropriate section.

This is an example of a report. This report shows the score obtained in the different sub-areas. The different scores indicate how the beneficiary works in that sub-area, providing the operator with important information. The final report will also contain qualitative data collected by the operator during the administration of the questionnaire. All indications for the production of the report will be included in the guideline.
